---

## SUMMARY

Backend Developer focused on building scalable, high-performance systems and clean, maintainable backend architecture. Experienced in developing an internal Learning Management System (LMS) CMS integrated with SSO, optimizing RESTful APIs, and improving database performance for large-scale systems. Actively contributes to cross-functional projects involving React and Go to improve system reliability and efficiency.

## EXPERIENCE

### Back End Developer | CBNCloud

*December 2024 – Present — Jakarta Raya, Indonesia*

- Built and maintained CBNCloud's internal LMS (Learning Management System) CMS with Cloudia CRM SSO integration, streamlining secure access and employee training management.
- Delivered and customized CMS solutions using FilamentPHP across multiple industries, including banking, hospitality, and external LMS platforms.
- Contributed to the development of Cloudia CRM, CBNCloud Website CMS, and Budget Controller (mini-ERP), enhancing system reliability and performance.
- Diagnosed and resolved a production outage in CBNCloud's SSL Certificate Notification System, then re-platformed its deployment to a GitOps (ArgoCD/OKD) pipeline with hardened CI safeguards.
- Supported external enterprise clients like SPPI (LSP) by overseeing the maintenance and evolution of CMS platforms, addressing reported issues, and assisting in the delivery of Phase 2 system upgrades.

### Design Engineer | Innomatics

*August 2023 – November 2023 — Jakarta, Indonesia*

- Reviewed schematic diagrams and I/O lists for assigned projects.
- Analyzed program logic and understood the overall project scope.
- Developed problem-solving skills within an engineering context.

### Electrical Engineer | PT. Graha Usaha Teknik

*July 2022 – August 2022 — Jakarta, Indonesia*

- Studied the project implementation process from engineering through material procurement, delivery coordination to the site, field installation procedures, and testing as documented in work progress reports.

## EDUCATION

Telkom University — Bachelor's Degree, Electrical and Electronics Engineering — August 2019 – August 2023

Purwadhika Digital Technology School — Web Development Bootcamp, Full-Stack Web Development — April 2024 – September 2024

Wall Street English Indonesia — English Language Course, English — October 2023 – April 2024

## CERTIFICATIONS

- Basic Go-Lang for Back End Developer
- Responsive Web Design
- Building with the Claude API
- Fundamental Front-End Web Development (2021)

## SKILLS

- Next.js, React.js, Tailwind CSS, Laravel
- PHP, JavaScript, TypeScript, Golang
- Node.js, Express.js
- MySQL, PostgreSQL
